Circle No. 35 on Reader Service Card

THE CARBIDE "MASTER" BUR

PRODUCES FINE FINISH SURFACES— GRANULAR CHIPS . . . NO SLIVERS, NO SKIN CUTS

the original and still unequalled all purpose bur to handle any job!

50% more cutting area yet COSTS NO MORE than conventional burs

guaranteed to outperform any competitive bur ever used or will be furnished unconditionally without charge

Ground electronically on the industry's finest, newest and closest tolerance machines to a high precision standard. Will grind such difficult-to-machine materials as HY-80, stainless steel, Titanium, H-11, and Beryllium . . . as well as all standard metals and alloys.

The largest line of bur shapes and sizes available anywhere. Ready for shipment from stock. Early and dependable delivery of resharpened tools. For complete information contact your local distributor.

THE METAL REMOVAL COMPANY
1851 W. Columbia Avenue • Chicago, Illinois 60626
Plants Located in CHICAGO • LOS ANGELES • SAN JUAN

MASTER TOOL AND WHEEL MAKERS FOR THE WORLD

36 WAYS TO CUT COSTS IMPROVE QUALITY

with Grafo COLLOIDAL GRAPHITE

36 Dispersions developed for particular applications — provide easier, smoother and lower operating costs.

Extruding • Forging • Die-Casting • Finishing

GRAFO solves problems of excessive temperatures, pressures or abrasions . . . provides better metal flow . . . prevents sticking . . . reduces die wear. There's a GRAFO Water, Oil, Alcohol, or Special Dispersion for every industrial need.

Write for name of our representative nearest you. Send for Application Chart.

DIE CASTINGS

Abrasive Mass Finishing of Zinc & Aluminum Castings	Jan. p. 59
Acid Copper Underplate Improves Plating of Zinc Die Castings	Feb. p. 39
Adhesive Bonding Reaches Home Appliances	June p. 55
Aluminum Die Cast Wheels	Aug. p. 26
Anodize Aluminum Die Castings	Aug. p. 44
New Anodized Coating for Zinc	Apr. p. 45
Automatic Flip-Flopping of Parts on Free Abrasive Machine	June p. 57
Beauty, Strength, Low Cost for Office Furniture	Dec. p. 32
Better Performance from Die Casting Dies	May p. 58
Bigger Die Castings Mean Bigger Dies	May p. 10
Built in Reliability with Die Castings	March p. 35
Cast Alloy Slide Rule	June p. 14
Coating Extends the Life of Thermocouple Tubes	Jan. p. 66
Colloidal Graphite—Lubricant and Release Agent	Sept. p. 86
Critical Look at Copper-Base Forgings, A	Nov. p. 92
Deep-Hobbing of Die Steel	Nov. p. 51
Designing for Brass Die Casting	Oct. p. 31
Die Cast Aluminum with Thinner Walls	April p. 10
Die Cast Appliance Door—Designed to Please the Women	Dec. p. 36
Die Casting Industry in 1964, The	May p. 38
Die Casting the High Melting Point Alloys	Jan. p. 54, Feb. p. 22, Apr. p. 34
Die Casting Machine Instrumentation	Sept. p. 58
Die Castings, Not Plastics	May p. 10
Die Cast Zinc in the 1965 Cars	Feb. p. 24
Do Chromium Plated Plastics Compete?	May p. 57
EDM for Production Machining	Dec. p. 45
Eliminate Spalling, Decrease Soldering of Die Casting Dies	Nov. p. 46
End Uses of Die Castings, The	May p. 44
Epoxy Resin for Checking Die Cavities	Jan. p. 50
Fast, Accurate Way to Make Prototypes	May p. 60
Fifty-five Years of Die Casting Growth	March p. 12
Finishing Magnesium Fabrications	July p. 55
Government Fiat said, "Cut Costs"—Die Castings Did It	Sept. p. 66
How Xerox Builds in Reliablity	Mar. p. 42
If It's Good, Stick with It!	Sept. p. 51
Is the All Aluminum Car Coming?	April p. 10
Magnesium Die Casting is Fast, Dependable, Competitive	July p. 51
Magnesium—Metal on the Move	July p. 35
Man Who Helped Save an Industry, The	Dec. p. 42
New Life for Copper Alloy Die Castings	Nov. p. 43
Need Strong, Corrosion Resistant Parts?	Oct. p. 36
New Factor in Copper Alloy Castings	Oct. p. 37
New Surface Protective Coating for Copper Alloys	Oct. p. 57
Non-standard Fasteners Made by Die Castings	July p. 22
Plating Zinc Die Castings	Nov. p. 65
Pointers for Designing Magnesium Die Castings	July p. 40
Recording Instrumentation: A Valuable Die Casting Tool	Dec. p. 25
Self Tapping Screws for Die Castings	Aug. p. 39
Silicone Release Agents—Partner in Precision	April p. 31
Solid Lubricant Solves Die Casting Problem	Feb. p. 9
Specify Magnesium to Reduce Machining Costs	July p. 60
Stud Welding Expands Uses of Die Castings and Extrusions	Feb. p. 30
Textured Die Castings	June p. 14
There's More to Die Casting than Die Casting	Sept. p. 69
Trim Dies Now Do More	Nov. p. 41
Typical Properties of Commonly Used Brass and Bronze Casting Alloys	Oct. p. 54
Ultrasonics Improves Plating, Eliminates Rejects	Oct. p. 65
Way to Improve Die Casting Core Life, A	Nov. p. 49
Where Corrosion is Extreme—Use Die Castings	Jan. p. 79
You Don't Have to Be Big to Compete	Aug. p. 34
Zinc Die Casting of the Year, The	Nov. p. 42

EXTRUSIONS

All Aluminum Hull Planned for Ocean-going Ship	July p. 22
Aluminum Along the Highways	March p. 12
Aluminum Extrusions Win Design Award	Feb. p. 9
Aluminum Impacts in the Defense Arsenal	April p. 10
Changing End Uses of Aluminum Extrusions, The	Aug. p. 36
Chemical Pre-Paint Treatment Spurs Sales of Extruded Frames	March p. 56
EDM for Production Machining	Dec. p. 45
Extruded Section Gives Low Cost, High Efficiency	April p. 59
Extrusion Dies—Design, Construction & Service Factors	Nov. p. 86
Extrusion Industry, The: 1965	May p. 46
Extrusions Need Not Be Expensive	Feb. p. 21
Extrusion Roundup	Dec. p. 57
Finishing Magnesium Fabrications	July p. 55
How Xerox Builds in Reliability	March p. 42
Increase the Efficiency of Heat Exchangers	Sept. p. 64
Is the All Aluminum Car Coming?	April p. 10
Lower Installation Costs—Longer Life With Extrusions	Jan. p. 53
Magnesium—Easy to Extrude	July p. 44
Magnesium—Metal on the Move	July p. 35
Pegasus Flies Again	April p. 10
Problems in the Buying and Selling of Extrusions	Sept. p. 53
Properties of Extruded Brasses and Bronzes	Oct. p. 38
Specify Magnesium to Reduce Machining Costs	July p. 60
Stud Welding Expands Uses of Die Castings & Extrusions	Feb. p. 30
Underwater Extrusion Cuts Costs	July p. 22
Where Space is Tight, Use Extrusions	Sept. p. 90

EDITORIAL INDEX

FINISHING

Abrasive Mass Finishing of Zinc and Aluminum Castings Jan. p. 59
Absorption System Controls Fumes While Recovering Solvents April p. 54
Acid Copper Underplate Improves Plating of Zinc Die Castings Feb. p. 39
Anodize Aluminum Die Castings Aug. p. 44
Automatic Flip-Flopping of Parts on Free Abrasive Machine June p. 57
Chemical Pre-Paint Treatment Spurs Sales of Extruded Frames March p. 56
Colloidal Graphite—Lubricant and Release Agent Sept. p. 86
Die Cast Appliance Door—Designed to Please the Women Dec. p. 36
Finishing Magnesium Fabrications July p. 55
Is the Finish Reliable? March p. 55
New Anodized Coating for Zinc Apr. p. 45
New Surface Protective Coating for Copper Alloys Oct. p. 57
Plating Zinc Die Castings Nov. p. 65
Self Tapping Screws for Die Castings Aug. p. 39
Should You Do Your Own Barrel or Vibratory Finishing? May p. 63
Specify Magnesium to Reduce Machining Costs July p. 60
There's More to Die Casting than Die Casting Sept. p. 69
Ultrasonics Improves Plating, Eliminates Rejects Oct. p. 65
Vibratory Finishing Slide Rule March p. 12

FORGINGS

Copper Base Forging Alloys Oct. p. 34
Critical Look at Copper-Base Forgings, A Nov. p. 92
EDM for Production Machining Dec. p. 45
Finishing Magnesium Fabrications July p. 55
Forged Wheel Hubs Eliminate Salvage Operation May p. 53
Forgers Talk Buyer-Vendor Relations, The Sept. p. 49
Forgings from Sintered Aluminum Aug. p. 23
Have You Considered Magnesium Forgings July p. 46
How Xerox Builds in Reliability March p. 42
Is the All Aluminum Car Coming? April p. 10
Magnesium—Metal on the Move July p. 35
Pegasus Flies Again April p. 10
Precision Cast Forging Dies June p. 52, July p. 49
Precision Forging—Cost Cutting for Complex Brass and Copper Parts Oct. p. 51
Precision Forging Sales up 25% in 6 Years May p. 52
Specify Magnesium to Reduce Machining Costs July p. 60
When Weldments Fail Use Forgings Aug. p. 28
Why Use Forgings for a Clock Case Dec. p. 28
Zero Defects with Steel Forgings Sept. p. 63

GENERAL ARTICLES

Abrasive Mass Finishing of Zinc and Aluminum Castings Jan. p. 59
Bidding—for Business or Profit? Sept. p. 45
Case Against Overspecifying, The Sept. p. 52
Colloidal Graphite—Lubricant and Release Agent Sept. p. 86
Continuous Cast Bronze Jan. p. 39
Critical Look at Copper-Base Forgings, A Nov. p. 92
EDM Belongs in your Tool Room Nov. p. 39
EDM for Production Machining Dec. p. 45
Fast, Accurate Way to Make Prototypes May p. 60
Finishing Magnesium Fabrications July p. 55
How Xerox Builds in Reliability March p. 42
If You Overspecify Tolerance, You'll Pay Sept. p. 43
Magnesium—Metal on the Move July p. 35
Materials/Equipment for Tool and Die Makers Nov. p. 94
Metal Spinning Jan. p. 44
New Alumina Process May Make U. S. Independent of Exports July p. 22
New Furnace Increases Refractory Metals Output July p. 22
New Surface Protective Coating for Copper Alloys Oct. p. 57
Sales Engineer Talks about Buyer-Vendor Relations, A Sept. p. 47
Specify Magnesium to Reduce Machining Costs July p. 60
Typical Properties of Commonly Used Brass and Bronze Casting Alloys Oct. p. 54
Ultrasonics Improves Plating, Eliminates Rejects Oct. p. 65
U. S. to Have New-Type European Smelter July p. 63
Vendor Rating Helps Both Buyer and Seller Sept. p. 40
Why Tooling Prices Vary Nov. p. 37

INVESTMENT CASTINGS

Abrasive Mass Finishing of Zinc and Aluminum Castings Jan. p. 59
Automatic Flip-Flopping of Parts on Free Abrasive Machine June p. 57
Case Against Overspecifying, The Sept. p. 52
Cast Alloy Slide Rule June p. 14
Ceramic Cores Increase Yield of Investment Castings 200% June p. 51
Finishing Magnesium Fabrications July p. 55
Ford's Turbine Uses New Nickel Alloy Jan. p. 13
Guaranteed: 95% Conductivity in Investment Castings Oct. p. 33
How Xerox Builds in Reliability March p. 42
Investment Cast Blades Nip Costs, Slash Operations Jan. p. 43
Investment Casting Can Be Mechanized April p. 39
Investment Casting Can Improve Your Product Aug. p. 32
Key to Reliability in Investment Castings, The March p. 38
"Lost Plastic" Process Aids Ultra-Thin-Wall Investments Dec. p. 38
Magnesium Investment Casting for Freedom of Design July p. 38
Magnesium—Metal on the Move July p. 35
New Surface Protective Coating for Copper Alloys Oct. p. 57
Parts That Must Not Fail Feb. p. 19
Plaster Mold and Investment Casting for A Difficult Part Nov. p. 61
Sales Engineer Talks About Buyer-Vendor Relations, A Sept. p. 47
Selecting a Casting Source for Reliability March p. 32
Silicone Release Agents—Partner in Precision April p. 31
Specify Magnesium to Reduce Machining Costs July p. 60
Strengthening Steels April p. 10
Stronger Steel with Beryllium April p. 10
Typical Properties of Commonly Used Brass and Bronze Casting Alloys Oct. p. 54
Ultrasonics Improves Plating, Eliminates Rejects Oct. p. 65
You Can Investment Cast the Most Minute Detail Oct. p. 49

PERMANENT MOLD CASTINGS

Abrasive Mass Finishing of Zinc and Aluminum Castings Jan. p. 59
Beauty, Strength, Low Cost for Office Furniture Dec. p. 32
Colloidal Graphite—Lubricant and Release Agent Sept. p. 86
Finishing Magnesium Fabrications July p. 55
How Xerox Builds in Reliability March p. 42
Magnesium—Metal on the Move July p. 35
New Factor in Copper Alloy Castings Oct. p. 37
New Surface Protective Coating for Copper Alloys Oct. p. 57
Over $1 Million Saved on Missile Parts Aug. p. 30
Pegasus Flies Again April p. 10
Specify Magnesium to Reduce Machining Costs July p. 60
Typical Properties of Commonly Used Brass and Bronze Casting Alloys Oct. p. 54
Ultrasonics Improves Plating, Eliminates Rejects Oct. p. 65

PLASTER MOLD CASTINGS

Abrasive Mass Finishing of Zinc and Aluminum Castings Jan. p. 59
Colloidal Graphite—Lubricant and Release Agent Sept. p. 86
Finishing Magnesium Fabrications July p. 55
How Xerox Builds in Reliability March p. 42
Magnesium—Metal on the Move July p. 35
New Surface Protective Coating for Copper Alloys Oct. p. 57
Plaster Mold and Investment Casting for a Difficult Part Nov. p. 61
Specify Magnesium to Reduce Machining Costs July p. 60
Typical Properties of Commonly Used Brass and Bronze Casting Alloys Oct. p. 54
Ultrasonics Improves Plating, Eliminates Rejects Oct. p. 65

POWDER METALLURGY

Aluminum Powder Metallurgy June p. 35
Aluminum Working Lubricant June p. 42
Copper Base Alloys for Powder Metallurgy Oct. p. 40
Design Ideas for Powder Metallurgy Feb. p. 28
Double Pressed, Double Sintered Parts June p. 45
Electrical Conducting Parts Made from Metal Powders Oct. p. 42
Forgings from Sintered Aluminum Aug. p. 23
High Energy Rate Compacting June p. 44
How Xerox Builds in Reliability March p. 42
Inspection Planning Insures Dependable Powder Metal Parts March p. 40
International Powder Metallurgy Conference June p. 50
Lower Tooling Costs in Powder Metallurgy March p. 12
Magnesium—Metal on the Move July p. 35
New Low Cost Substitute for Silver Powder, A Dec. p. 38
New Process May Make Powdered Metal as Hard as Forgings Jan. p. 13
New Technique for Powder Metal Die Finishing Nov. p. 45
Particle Size Control Insures Consistent Properties Jan. p. 48
Powder Metallurgy Rising 20% a Year May p. 48
Powder Metallurgy: Where Will it go from Here? May p. 50
Sales Engineer Talks about Buyer-Vendor Relations, A.
Small Pump Housing—One Third the Cost by Powder Metallurgy Aug. p. 37
Smooth Surfaces from Powder Metallurgy April p. 29
Spherical Metal Powders June p. 14
Strength and Impact Resistance of Medium Density Ferrous Sinterings, The Nov. p. 56
